

Call for Proposals

ZMB Young Scientist

Grant 2017

Building bridges between life science disciplines and enabling cutting edge technology are the main ideas of the **Center for Molecular Biosciences (ZMB)**. The ZMB signature award is thus meant to foster inter- and transdisciplinary work of young scientists from all areas of Kiel Life Science. The successful applicants are expected to combine expertise from different fields and/or faculties. Ideally, this also involves networking with partners from the ZMB.

Two different types of proposals will be awarded:

- Two **10k€** awards for **doctoral students**
- Two **20k€** **postdoc/young physician researcher** awards

Different flexible formats are supported, which can be either a **“classical” research proposal** or an **exceptional proposal for an international minisymposium** on a specific topic related to the work of the applicant.

Deadline: 28th August 2017

Criteria:

- Excellent individual quality: outstanding previous qualifications (Master or PhD/MD examination/thesis)
- Excellent quality of the proposal
- Research activities must be focused on life sciences
- For postdocs: Application max. 3 years after having obtained the doctoral degree (date of document is determinant)

To apply, please submit:

- Research or minisymposium proposal
- Letter of recommendation from PI
- CV
- Additional information about publication activity, age and the interdisciplinary significance of your doctoral thesis/current work is required

The winners will be invited to give a talk at the ZMB lecture ceremony in October 2017.

Please submit your proposals by e-mail (in one pdf: max. of 5 pages, Arial 11pt; 1.5 space) to the KLS Scientific Office, Dr. Kirsten Emmert, kemmert@uv.uni-kiel.de.
